Andrew Stein

Software Developer

48 Morgan Ave. APT 4R Brooklyn, NY 11237
cell : (512) 796 4375   steinlink@gmail.com

SUMMARY

A seasoned professional in Java and .NET enterprise application design and implementation, Andrew Stein has recently become infatuated with functional programming in the form of Clojure and Haskell, and seeks a fast-paced, challenging environment in which to hone his skills. In addition to his unrivaled versatility as a programmer, he enjoys music, biking, origami and southern cooking.

EDUCATION
University of Texas at Austin

Bachelor of Sciences in Mathematics, specializing in Scientific Computation

EXPERIENCE

Software Engineer | www.mojiva.com
December 2008 - Present

Developed a Java platform for ad-serving in collaboration with a Ukranian team, and a Clojure based Analytics platform. Roughly equal division between management, operations and development.

Freelance Consultant | www.texodusmedia.com
May 2008 – December 2008

Developed 2 – 4 week projects for a litany of medium sized companies, everything from data management to flash, though most contracts were implemented in Java by choice.

Consultant | www.hearst.com
September 2007 – May 2008

Designed and implemented a prototype data processing and publication system in C# to support a consumer e-paper device.

Software Engineer | www.datranmedia.com
Febuary 2006 – September 2007

Served as a junior Java developer on the Stormpost product, primarily bug fixing and small feature design/implementation. Additionally, completed a 10 month port of the Stormpost codebase from Java to .NET
